***Reasons For Allowance***

5. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 7, 10, and 12, Applicants particular method and associated systems of each of said transmission terminals comprises: a communication controller comprising a storage area, wherein the storage area comprises a status table, and wherein the status table comprises: a first counter that indicates that data has been received; a second counter that indicates that no data has been received; a repetition required flag that indicates that there is no data reception during a preset time period and that data repetition is required; and a third counter that indicates that data repetition is required, wherein the third counter is assigned a value when the repetition required flag is set to indicate that data repetition is required and wherein the timer starts at the start of reception of the information by each of said transmission terminals, wherein the first transmission terminal: (a) increments the first counter when the first transmission terminal receives the information from the first transmission line; (b) determines whether the information is being transmitted from the second transmission line when no information is received by the first transmission terminal; (c) checks the repetition required flag and the third counter to determine whether data repetition is required when the information is being transmitted from the second transmission line; (d) relays the information to the first transmission line and sends the information to the device control block when the repetition required flag and the third counter indicate that data repetition is required; (e) discards the information when data repetition is not required; and (f) determines whether the timer has reached a preset time, wherein when the first transmission terminal determines that the timer has not reached the preset time, the first transmission terminal repeats (a)-(f), and wherein when the first transmission terminal

determines that the timer has reached the preset time, the first transmission terminal: increments the second counter and resets the first counter; sets the repetition required flag to indicate that there is no data reception during the preset time period and that data repetition is required; decrements the third counter; and resets the timer was not disclosed by, would not have been obvious over, nor would have been fairly suggested by the prior art of record.

The dependent claims, being further limiting to the independent claims, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
